# Creating a model of community-centered, compassionate wellness & healthcare

Anchor the model in heart-centered

Unity Consciousness and base it on human wholeness

Unity Consciousness

Community

Stewardship

Connect and create a lively, vital, thriving **Community** guided by a participatory Board of Directors, empowered and energized by vibrant volunteers and clients. Welcome all people and gather a community interested in the art and science of health, holistic wellness and personal transformation. Connect wellness practitioners of all kinds to those in need of services, and in doing so, facilitate the flow of a diverse range of human gifts as well as incubate economic prosperity and growth.

Take care to embody a culture of collaboration, cooperation, mutual respect and deep love and acceptance for all beings through **Stewardship**, by creating and holding an organizational structure that is a container for healing. Develop care structures for people to receive compassionate, collaborative, well-contemplated holistic care. Design and develop science-based, financially accessible programming that helps people learn self-regulation skills, and to know there is support and a connection-hub for help when they need it. Create a vital, loving and humane working environment for Steward-Employees of The Healing Garden that is life-giving and gift-affirming...conducive to inspiration, connection, creativity and evolution for individuals and the collective human body.

The Healing Garden
Heal Yourself. Heal Others. Thrive!
The Healer is Within You
